

EGS is recruiting an experienced GEOTECHNICAL ENGINEER

Location: Singapore & Offshore

Position: Permanent

Salary: Based on experience

Description

Following the mobilization of our latest DP2 Geotechnical Drilling Vessel, we are looking for an experienced Geotechnical Engineer to join our expanding Geotechnical Division in Singapore. This is an exciting opportunity to be a key member of the team and play a leading role in the development of our Geotechnical Department. The role has both offshore and onshore elements which will allow successful candidates to be part of a variety of different projects, with great opportunities for travel around the world.

Offshore you will be part of a hard-working and dedicated team working on complex projects in global locations. You will be responsible for acquiring, processing and interpreting high quality geotechnical data on a variety of vessels in challenging marine environments. Onshore you will assist the tendering team by providing technical inputs and you will be responsible for delivering our clients focused products using industry leading techniques while contributing to the innovation and improvement of processing and reporting workflows within the Geotechnical Division.

Requirements

- Minimum 5 years of experience in a similar position and a university degree in a Geology or related subject.
- Experience in offshore windfarm and/or oil & gas surveys.
- Experience in marine geotechnical investigation with a thorough understanding of geotechnical sampling, CPT techniques and laboratory analysis with demonstrable experience in acquiring, processing and interpreting geotechnical data.
- Knowledge of gINT software and MS Office suite is required. Experience with Datgel CPT Tools, Seismic CPT processing and GIS packages is preferred.
- Fluent spoken English and professional English writing skills are required.
- Party Chief experience is advantageous.
- Site work rotations can be up to 6-8 weeks, therefore the ability to work away from home for long periods is essential.
- Self-motivated, with the ability to work well under pressure in a team environment.

Our geotechnical operations are run out of our Singapore office. For non-residents of Singapore, relocation will be required.

Joining the EGS team will allow you to expand your skills and knowledge within the marine survey industry and provide you with excellent opportunities to actively develop your career through mentoring and professional training. EGS offers a competitive salary and a comprehensive medical insurance package.

To apply for this position please send your CV with up to date contact details for Referees and a Cover Letter to Personnel@egssurvey.com. EGS reserves the right to reject incomplete submissions.

The deadline for submission is 29th February 2020.
